

INVESTMENT MADE FOR WOMEN

ABOUT FINMARIE

FinMarie is the first online investment platform made by women for women in Europe. FinMarie offers women one-stop financial advice & a cost-effective investment solution using specifically selected financial tools. Our mission is to motivate women to control their financial independence and increase their financial confidence by providing financial education to increase knowledge and awareness about money and investing.

FinMarie is your expert partner for training employees in the areas of finance, money, and investment. For many employees, a financial workshop is their first experience learning how to manage money more effectively.

FinMarie has been redefining digital wealth management for women since early 2019 with a hybrid financial advice model consisting of an investment platform and personal financial advice. We offer unique investment solutions based on a client's investment preferences (low-cost ETFs and/or a sustainable investment option), risk preference, time horizon, and financial situation. The portfolio is then professionally managed to leave our clients free to focus on what is important to them and not spend time administering their investments.

WHAT WE DO

We are different as we understand women - we are women supporting women and understand what women need to overcome their hesitation with taking control of their financial independence.

Our Educational Platform is designed to provide women with the knowledge and tools they can use to build their confidence with money and finances to control their financial independence. And as we are qualified and experienced financial advisers, we can provide personal advice and recommend a range of financial products that suit each woman, regardless of where she is in her financial journey.

THE ENTREPRENEURS

Karolina Decker
Gründerin und CEO

Azra Husejnovic
Marketing Manager

Karolina Decker had already created a solid foundation with two master's degrees in economics (University of Warsaw / Warsaw School of Economics) before starting her banking sector career. She worked in the financial sector for 10 years – initially as a manager at DnB NORD Polska in Warsaw in real estate financing. She gained management experience and was responsible for a financing volume of EUR 250 million per year.

Subsequently, she worked at Deutsche Bank in Berlin in the area of compliance. Karolina has the business license according to §34f GewO. She is still involved as the founder of the NGO "Mind the Gap." She works with women to help determine their goals and provide financial advice. Using her experience of over 10 years in Financial Services, her goal is to make financial advice accessible and affordable for every woman - at every stage of their financial journey.
